

## Parts of the HT Mark

**All parts of the HT mark must be present to use in the manufacture of WPM receiving the IPPC mark. The agency shown must also be accredited by ALSC. Most HT material from international sources does not meet this criteria so even if an HT mark is present, it cannot be used to make WPM that will receive an IPPC or DUN mark. If you are receiving lumber from an international source check with TP to determine if the agency is accredited with ALSC.**
