**PS1-09 / PS2-10 / ANSI APA PRP 210-2008 / JAS / AS/NZS / CSA O121 CSA
O151 / CSA O153 / CSA 0325 Construction Sheathing**

Panels certified by an accredited agency are equivalent and interchangeable with panels of the same grade and thickness and certified to the same standard by other accredited agencies. When specifying panels for use in floor, wall and roof applications, it is suggested to specify panels by grade or span rating in accordance with PS1 or PS2.

Specifying panels certified by a particular certification agency limits the products available and may cause unnecessary project delays.

Panels with the Audited by TP® certification mark are interchangeable with panels marked by other certification agencies.

Copies of our accreditation certificates as a recognized Inspection Agency and Test Laboratory can be downloaded from the TP website (www.tpinspection.com).
