

WOOD PACKAGING MARKING

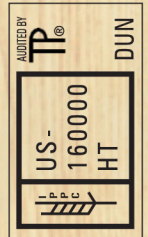

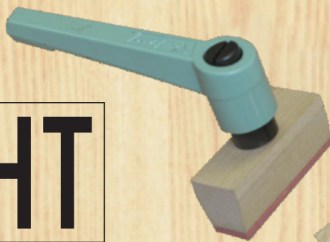

MANUAL OR HAND STAMPING

Hand Mounts and Stamp Hammers are the simplest way to mark pallets and wood packaging products. Used with pre-inked, or dry stamp pads with lumber ink, to provide clear long lasting imprints. Many different sizes and styles are available.

SELF-INKING HAND PRINTER

Fast, consistent and continuous printing on entire lifts of lumber in a single pass. Eliminates the need for stamp pads and continually re-inking the stamps. Lightweight & portable operation allows users to stamp anywhere throughout the plant.

AUTOMATED PRINTING

For higher volume applications, automatic marking provides continuous imprints without the need for constant attention.

Allows workers to perform other tasks while wood is being stamped automatically.

Can be mounted above, beside or below the production line.
